

Thank you Halifax Regional Council for providing enhanced opportunities for our students!

Supplementary Funding

Supplementary Funding is provided by Halifax Regional Council to the Halifax Regional School Board to enhance the Public School Program in schools across the region.

This school year, the HRM will provide approximately \$16 million in addition to the funding the HRSB receives from the provincial government and through mandatory municipal contributions.

Supplementary Funding is raised through a municipal tax assessment on residential and business properties.

The HRM is the only municipality in the province that voluntarily provides additional funding in this manner and they should be applauded for their leadership to provide students with enhanced opportunities.

What does Supplementary Funding provide?

Supplementary Funding allows students to benefit from program and service enhancements above the general funding received from the province including:

- All-City Music
- Fine arts programs
- Early Learning Opportunities program
- More support for resource and libraries
- Student Support Workers
- Social Workers
- Smaller class sizes
- Therapeutic swim program
